Corporate information

Canada Pension Plan Investment Board (CPP Investment Board) was established in December 1997 pursuant to the *Canada Pension Plan Investment Board Act* (the Act). CPP Investment Board is a federal Crown corporation, all of the shares of which are owned by Her Majesty the Queen in right of Canada. CPP Investment Board is responsible for assisting the Canada Pension Plan (the CPP) in meeting its obligations to contributors and beneficiaries under the legislation *Canada Pension Plan*. It is responsible for managing amounts that are transferred to it under Section 108.1 of the *Canada Pension Plan* in the best interests of CPP beneficiaries and contributors. CPP Investment Board received its first funds for investing purposes from the CPP in March 1999. CPP Investment Board's assets are to be invested in accordance with the Act, the regulations and the investment policies with a view to achieving a maximum rate of return without undue risk of loss, having regard to the factors that may affect the funding of the CPP and the ability of the CPP to meet its financial obligations on any given business day.

CPP Investment Board is exempt from Part I tax under paragraphs 149(1) (d) of the *Income Tax Act (Canada)* on the basis that all of the shares of CPP Investment Board are owned by Her Majesty the Queen in right of Canada. Further, all of CPP Investment Board's wholly owned subsidiaries are exempt from Part I tax.

The Condensed Interim Consolidated Financial Statements (Consolidated Financial Statements) provide information on the net assets managed by CPP Investment Board and do not include the liabilities and other assets of the CPP. CPP Investment Board has a fiscal year end of March 31.

CPP Investment Board's registered office is at One Queen Street East, Toronto, Ontario, Canada.

The Consolidated Financial Statements were approved by the Board of Directors and authorized for issue on February 13, 2019.

1. Summary of significant accounting policies

a) Basis of presentation

These Consolidated Financial Statements have been prepared in compliance with International Accounting Standard 34, *Interim Financial Reporting* (IAS 34) and do not include all of the information and disclosures required in the annual consolidated financial statements. These Consolidated Financial Statements should be read in conjunction with CPP Investment Board's annual Consolidated Financial Statements and the accompanying note disclosures included on pages 104 to 136 in CPP Investment Board's 2018 Annual Report. These Consolidated Financial Statements follow the same accounting policies and methods as the most recent annual Consolidated Financial Statements.

CPP Investment Board qualifies as an investment entity as it meets the following definition of an investment entity outlined in IFRS 10, *Consolidated Financial Statements* (IFRS 10):

- Obtains funds from one or more investors for the purpose of providing those investor(s) with investment management services. In the case of CPP Investment Board, we have one investor (more specifically, we invest amounts transferred from the CPP that are not required to pay current CPP benefits), but we invest the funds in the best interests of a wide group of individuals being the contributors and beneficiaries of the CPP.
- Commits to its investor(s) that its business purpose is to invest funds solely for returns from capital appreciation, investment income, or both.
- Measures and evaluates the performance of substantially all of its investments on a fair value basis.

No significant judgments or assumptions were made in determining that CPP Investment Board meets the definition of an investment entity as defined in IFRS 10.

Certain comparative figures have been reclassified to conform to the current period's financial statement presentation.

b) Subsidiaries

CPP Investment Board is required to report the results of its operations in accordance with IFRS 10. As a consequence, the Consolidated Financial Statements represent the results of operations of CPP Investment Board and its wholly-owned subsidiaries that were created to provide investment-related services to support its operations. Operating subsidiaries of this nature include those that provide investment advisory services or subsidiaries that were created to provide financing to CPP Investment Board.

Subsidiaries that are managed by CPP Investment Board to hold investments are referred to herein as investment holding subsidiaries. Such subsidiaries are not consolidated in these Consolidated Financial Statements but instead are measured and reported at fair value. Fair value for unconsolidated investment holding subsidiaries is based on the fair value of the underlying investments and investment liabilities held by the investment holding subsidiary together with its accumulated net income from operations. The determination of the fair value of the underlying investments and investment liabilities are based on the valuation techniques and related inputs outlined in note 2a to h.

c) Valuation of investments and investment liabilities

Investments and investment liabilities are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

In an active market, fair value is best evidenced by an independent quoted market price. In the absence of an active market, fair value is determined by valuation techniques that make maximum use of inputs observed from markets. See note 2a to h for more details about the determination of fair value.

2. Fair value determination

CPP Investment Board manages the following types of investments and investment liabilities and determines fair value as follows:

a) Equities

- (i) Public equity investments are made directly or through funds, including hedge funds. Fair value for publicly traded equities, including equity short positions, is based on quoted market prices. Fair value for fund investments is generally based on the net asset value reported by the external administrators or managers of the funds.
- (ii) Private equity investments are generally made directly or through ownership in limited partnership funds. The fair value for investments held directly is primarily determined using earnings multiples of comparable publicly traded companies or discounted cash flows. Significant inputs for these valuation methods include company-specific earnings before interest, taxes, depreciation and amortization (EBITDA), earnings multiples of comparable publicly traded companies, projected cash flows and discount rates using current market yields of instruments with similar characteristics. Recent market transactions, where available, are also used. In the case of investments held through a limited partnership fund, fair value is generally determined based on relevant information reported by the general partner using similar accepted industry valuation methods.

b) Fixed income

- (i) Bonds include non-marketable and marketable bonds. Fair value for non-marketable Canadian provincial government bonds is calculated using discounted cash flows based on current market yields of instruments with similar characteristics. In the case of marketable bonds, including bond short positions, fair value is based on quoted prices or calculated using discounted cash flow based on benchmark yield curves and credit spreads pertaining to the issuer.
- (ii) Other debt includes investments in direct private debt, private real estate debt, asset-backed securities, distressed mortgage funds, private debt funds, hedge funds and investments in income streams of intellectual properties and royalties.

Fair value for direct investments in private debt, private real estate debt and asset-backed securities is based on quoted market prices or broker quotes or recent market transactions, if available. Where the market price is not available, fair value is calculated using discounted cash flows based on significant inputs such as projected cash flows and discount rates using current market yields of instruments with similar characteristics.

Fair value for fund investments is generally based on the net asset value as reported by the external administrators or managers of the funds.

In the case of investments in income streams of intellectual properties and royalties, fair value is primarily determined using discounted cash flows based on projected cash flows and discount rates using current market yields of instruments with similar characteristics.

- (iii) Money market securities include cash, term deposits, treasury bills, commercial paper and floating rate notes. Fair value is determined using cost, which, together with accrued interest income, approximates fair value due to the short-term or floating rate nature of these securities.

c) Absolute return strategies

Absolute return strategies include investments in hedge funds whose objective is to generate positive returns regardless of market conditions, that is, returns with a low correlation to broad market indices. The underlying securities of the funds could include, but are not limited to, equities, fixed income securities and derivatives. Fair value for fund investments is generally based on the net asset value as reported by the external administrators or managers of the funds.

d) Real assets

- (i) CPP Investment Board obtains exposure to real estate through direct investments in privately held real estate and real estate funds. Private real estate investments are managed by investment managers primarily through co-ownership arrangements.

Fair value for private real estate investments is primarily determined using discounted cash flows based on various factors such as net operating income, discount rate and terminal capitalization rate.

Fair value for real estate funds is generally based on the net asset value reported by the external managers of the funds.

- (ii) Infrastructure, energy and resources, and power and renewables investments are generally made directly, but can also occur through limited partnership funds.

The fair value of these investments is primarily determined using discounted cash flows based on significant inputs including projected cash flows and discount rates. Earnings multiples of comparable companies may also be used for determining the fair value of energy and resources investments.

Notes to the Condensed Interim Consolidated Financial Statements

For the three and nine months ended December 31, 2018

(Unaudited)

Fair value for investments held through limited partnership funds are generally based on the net asset value as reported by the external managers of the funds.

e) Securities purchased under reverse repurchase agreements and sold under repurchase agreements

Reverse repurchase and repurchase agreements are carried at the amounts at which the securities were initially acquired or sold, which, together with accrued interest income or expense, approximates fair value due to the short-term nature of these securities.

f) Securities borrowed and lent

Securities borrowing and lending agreements are transactions in which CPP Investment Board borrows securities from or lends securities to third parties. The lent securities remain on our Consolidated Balance Sheet as CPP Investment Board retains substantially all of the risks and rewards of ownership of the transferred securities. Correspondingly, borrowed securities are not recognized on the Consolidated Balance Sheet. Collateral received or pledged is generally in the form of cash, equities or fixed income securities. Cash collateral received is accounted for as an investment liability while equities and fixed income securities received as collateral are not recognized on the Consolidated Balance Sheet. Cash collateral pledged is accounted for as an investment asset, while securities collateral pledged by CPP Investment Board in securities borrowing agreements remain on the Consolidated Balance Sheet.

g) Derivative contracts

Fair value for exchange-traded derivatives, which includes futures, options and warrants, is based on quoted market prices. Fair value for over-the-counter derivatives, which includes swaps, options, forward contracts and warrants, is determined based on valuation techniques such as option pricing models, discounted cash flows and consensus pricing from independent brokers and/or third-party vendors. Inputs used in these valuation techniques may include, but are not limited to, spot prices, price volatilities, currency exchange rates, interest rate curves and credit spreads. In determining fair value, consideration is also given to the credit risk of the counterparty.

h) Debt financing liabilities

Debt financing liabilities consist of commercial paper payable and term debt. Commercial paper payable is recorded at the amount originally issued, which, together with accrued interest expense, approximates fair value due to the short-term nature of these liabilities. Fair value for term debt is based on quoted market prices.

Notes to the Condensed Interim Consolidated Financial Statements

For the three and nine months ended December 31, 2018

(Unaudited)

3. Derivative instruments

The fair value of derivative contracts was as follows:

Canada Pension Plan Investment Board

Notes to the Condensed Interim Consolidated Financial Statements

For the three and nine months ended December 31, 2018

(Unaudited)

b) Transfers between Level 1 and Level 2

During the nine months ended December 31, 2018, there were no transfers from Level 1 to Level 2 (December 31, 2017 - \$142 million) and no transfers from Level 2 to Level 1 (December 31, 2017 - \$16 million). Transfers between Level 1 and Level 2 depend on the availability of quoted market prices in active markets and valuations using inputs other than quoted prices that are observable. These transfers are deemed to have occurred at the end of period values.

c) Level 3 reconciliation

The following presents the reconciliations for investments included in Level 3 of the fair value hierarchy:

Reconciliation of changes in fair value for Level 3 investments

¹ Certain comparatives have been reclassified to conform to the current period's presentation.

² Includes return of capital.

³ Transfers into and out of Level 3 are deemed to have occurred at the end of period values.

⁴ Includes the entire change in fair value for the period for those investments that were transferred into Level 3 during the period, and excludes the entire change in fair value for the period for those investments that were transferred out of Level 3 during the period.

⁵ Included in Investment income.

⁶ Opening balance has been revised for an immaterial misclassification from Level 2 to Level 3.

During the nine months ended December 31, 2018 and December 31, 2017, transfers into and out of Level 3 were primarily due to changes in the availability of market observable inputs used to determine fair value.

Notes to the Condensed Interim Consolidated Financial Statements

For the three and nine months ended December 31, 2018

¹ In certain cases, external valuations are prepared by a third-party, hence valuation information is not available.

² May include certain recently acquired investments held at cost, which approximates fair value.

³ The range of input values represents the highest and lowest inputs used to value the investments in a particular asset class. The weighted average of the input values is calculated based on the relative fair values of the investments within the asset class. The diversity of investments reported within each asset class, such as the geographic location and industry sector of the investments, may result in certain ranges of inputs being wide and unevenly distributed across the range.

⁴ Certain comparatives have been revised to conform to the current period's presentation.

Notes to the Condensed Interim Consolidated Financial Statements

For the three and nine months ended December 31, 2018

(Unaudited)

Significant increases (decreases) in any of the above unobservable inputs would result in a significantly higher or lower fair value measurement. The inter-relationship of significant unobservable inputs and fair value measurement for the most significant key inputs identified in the table above is as follows:

- An increase (decrease) in the EBITDA multiple will result in a higher (lower) fair value.
- An increase (decrease) in the discount rate and terminal capitalization rate will result in a lower (higher) fair value.

The fair value of these direct investments classified within Level 3 of the fair value hierarchy above are based on accepted industry valuation methods that may include the use of estimates made by management, appraisers or both where significant judgment is required. By using valuation methods based on reasonable alternative assumptions, different fair values could result. With all other variables held constant the use of reasonable alternative assumptions would result in a decrease of \$6,300 million (March 31, 2018 - \$5,200 million, December 31, 2017 - \$4,200 million) or an increase of \$5,900 million (March 31, 2018 - \$6,000 million, December 31, 2017 - \$6,300 million) in net assets. This sensitivity analysis excludes investments where fair values are provided by Investment Managers as the underlying assumptions used are not available to CPP Investment Board.

5. Net investment income

Net investment income is reported net of transaction costs and investment management fees, and is grouped based on the nature of the income.

Net investment income

(CAD millions)	For the three months ended	
	December 31, 2018	December 31, 2017
Interest, dividends, and other investment income ¹	\$ 1,131	\$ 995
Realized gains on private equities and real assets ²	33	16
Unrealized gains on private equities and real assets ²	1,384	209
Unrealized gains on investment holding subsidiaries ^{2,3}	8,581	5,111
Realized and unrealized gains (losses) on public and other investments ^{2,4}	(6,318)	7,589
Total investment income	4,811	13,920
Investment management fees ⁵	(362)	(424)
Transaction costs ⁶	(175)	(94)
Net investment income	\$ 4,274	\$ 13,402

¹ Net of interest expense on debt financing liabilities of \$141 million (December 31, 2017 - \$75 million).

² Includes foreign currency gains or losses.

³ Unrealized gains on investment holding subsidiaries exclude investment management fees and transaction costs incurred by the subsidiaries. It is a composite of the following sources of income:

Interest, dividends, and other investment income of \$985 million (December 31, 2017 - \$822 million),
 Realized gains on private equities and real assets of \$1,662 million (December 31, 2017 - \$2,996 million),
 Unrealized gains on private equities and real assets of \$6,208 million (December 31, 2017 - \$592 million), and
 Realized and unrealized gains (losses) on public and other investments of \$(274) million (December 31, 2017 - \$701 million).

⁴ Consists of investment income from public equities, fixed income, absolute return strategies, derivatives and other.

⁵ Includes investment management fees of \$291 million (December 31, 2017 - \$244 million) incurred by investment holding subsidiaries.

⁶ Includes transaction costs of \$115 million (December 31, 2017 - \$35 million) incurred by investment holding subsidiaries.

Notes to the Condensed Interim Consolidated Financial Statements

For the three and nine months ended December 31, 2018

(Unaudited)

(CAD millions)	For the nine months ended	
	December 31, 2018	December 31, 2017
Interest, dividends, and other investment income ¹	\$ 3,937	\$ 3,360
Realized gains on private equities and real assets ²	44	76
Unrealized gains (losses) on private equities and real assets ²	2,208	(554)

Investment management fees ⁵	(1,270)	(1,229)
Transaction costs ⁶	(398)	(267)
Net investment income	\$ 13,652	\$ 21,950

¹ Net of interest expense on debt financing liabilities of \$355 million (December 31, 2017 - \$153 million).

² Includes foreign currency gains or losses.

³ Unrealized gains on investment holding subsidiaries exclude investment management fees and transaction costs incurred by the subsidiaries. It is a composite of the following sources of income:

Interest, dividends, and other investment income of \$3,406 million (December 31, 2017 - \$2,475 million),

Realized gains on private equities and real assets of \$4,220 million (December 31, 2017 - \$7,601 million),

Unrealized gains (losses) on private equities and real assets of \$7,492 million (December 31, 2017 - \$(2,606) million), and

Realized and unrealized gains on public and other investments of \$767 million (December 31, 2017 - \$704 million).

⁴ Consists of investment income from public equities, fixed income, absolute return strategies, derivatives and other.

⁵ Includes investment management fees of \$875 million (December 31, 2017 - \$771 million) incurred by investment holding subsidiaries.

⁶ Includes transaction costs of \$173 million (December 31, 2017 - \$86 million) incurred by investment holding subsidiaries.

6. Segment information

a) Investment segments

As explained in Corporate information on page 7, CPP Investment Board's sole purpose is to manage amounts transferred to it under Section 108.1 of the CPP Act in the best interests of CPP beneficiaries and contributors. This requires investing in assets with a view to achieving a maximum rate of return without undue risk of loss. During the first quarter, CPP Investment Board made executive management and organizational changes. This resulted in the reorganization of the previous five investment departments into six investment departments as described below. Comparative numbers have been revised to reflect this change.

- Total Portfolio Management - ensures the investing activities of the organization collectively produce a total portfolio that maximizes long-term returns without taking undue risk. Total Portfolio Management also directs the Balancing Portfolio (the remaining portion of the CPP Investment Portfolio after excluding the assets of all active programs managed by the other investment departments) to achieve overall desired investment exposures.
- Capital Markets and Factor Investing - invests assets globally in public equities, fixed income securities, currencies, commodities and derivatives, as well as engagement of investment managers and co-investments to invest in public market securities. Capital Markets and Factor Investing is also responsible for managing CPP Investment Board's liquidity needs.
- Active Equities - invests globally in public and soon-to-be public companies as well as securities focused on long-term global changes which can include earlier stage private companies. Active Equities also works with departments across the organization to ensure that environmental, social and governance

Notes to the Condensed Interim Consolidated Financial Statements

For the three and nine months ended December 31, 2018

(Unaudited)

risks and opportunities are incorporated into our investment decision-making and asset management activities.

- Credit Investments - responsible for public and private credit investments globally. Credit Investments invests across the entire credit structure, including term loans, high-yield bonds, mezzanine lending, structured products and other credit instruments for borrowers in all sectors.
- Private Equity - responsible for private equity investments globally including funds, secondaries and direct private equity investments.
- Real Assets - responsible for investments in real estate, infrastructure, energy and resources, and power and renewables, which are typically long term, tangible assets with steady income streams.

December 31, 2017	53,525	124,029	69,247	45,096	18,842	26,425	337,164

¹ Includes debt financing liabilities of \$5,002 million, \$18,443 million, \$4,790 million and nil (March 31, 2018 - \$3,466 million, \$15,807 million, \$4,783 million and nil, December 31, 2017 - \$3,889 million, \$16,166 million, \$2,998 million and \$424 million), based on the currencies of the issuances, in Canada, the U.S., Europe (excluding the U.K.), and the U.K., respectively.

7. Risk management

CPP Investment Board manages the investment portfolio on behalf of the Canada Pension Plan (CPP Investment Portfolio). The CPP Investment Portfolio is exposed to a variety of financial risks. These risks include market risk, credit risk and liquidity risk. CPP Investment Board utilizes a total portfolio approach to risk management which considers all of the investment activities taken together, including those made through its unconsolidated investment holding subsidiaries. In the discussion that follows, any references to the investment activities and exposures to risk of CPP Investment Board also include those of its unconsolidated investment holding subsidiaries.

CPP Investment Board employs the Risk/Return Accountability Framework, which establishes accountability of the Board of Directors, the various committees and the investment departments to manage investment related risks. CPP Investment Board manages and mitigates financial risks through the Risk Policy approved by the Board of Directors at least once every fiscal year. This policy contains risk limits and risk management provisions that govern investment decisions. It has been designed to achieve the mandate of CPP Investment Board.

Upper and Lower Absolute Risk Limits and the Absolute Risk Operating Range (AROR) are included within the Risk Policy, and these govern the amount of total investment risk that CPP Investment Board can take in the long term CPP Investment Portfolio. CPP Investment Board monitors the absolute risk, the possible loss of value expressed in absolute dollar and percentage terms, in the CPP Investment Portfolio daily and reports risk exposures to the Board of Directors on at least a quarterly basis. Risk targeting for the Investment Portfolio, and compliance with the Upper/Lower Risk Limits and AROR is assessed using an equity/debt risk equivalence ratio.

Stress testing

To complement the suite of risk measures used to monitor CPP Investment Portfolio risk, CPP Investment Board further examines the potential impact of exceptional but plausible adverse market events. Stress testing considers the effect of various hypothetical scenarios. CPP Investment Board has a bottom-up approach for stress testing that considers the effect of either historical or predictive shocks across the entire portfolio. The focus is predominantly on those expected to be more extreme tail event losses for the CPP Investment Portfolio. Generally, the forecasted time line considered is one year in order to appropriately include the effect of private asset valuations, as well as initial public market shocks. These are reported to both senior management and the Board.

Unlike VaR measures, which have an implied probability because they are calculated at a specified confidence level, there is generally no implied probability that our stress test scenarios will occur. Instead, trigger points will be highlighted as a potential situation starts to evolve and then the directional trend gauged accordingly.

a) Market risk

Market risk is the risk that the fair value or future cash flows of an investment or investment liability will fluctuate because of changes in market prices and rates. As discussed previously, CPP Investment Board manages market risk through the Risk/Return Accountability Framework. This includes investing across a wide spectrum of asset classes and investment strategies to earn a diversified set of risk premiums at the total fund level, based on risk limits established in the risk policies. In addition, derivatives are used, where appropriate, to manage certain risk exposures.

CPP Investment Board uses a tiered structure of limits to govern market risk by controlling the size of risk exposures. The top tier Board limits are currently based upon an equity/debt risk equivalency ratio further

discussed under Absolute Risk (see note 7c). The next level of market risk limits are set based upon volatility or exposure measures and reflect the market risk allocation methodology. These limits ensure that none of the individual investment departments' market risks grow faster than originally anticipated in the annual planning period. These measures are supplemented with drawdown triggers that highlight to senior management any individual strategies that are having losses outsized to their estimated investment risk levels. The lowest set of limits are investment program specific and are tailored to the way that the strategies are managed. Examples include, DV01 that measures the possible loss/gain in the investment strategy as a result of 1 basis point increase/decrease in interest rate yield curves, hedge ratios and concentration limits that assess the significance of systematic and non-systematic risks for long/short equity, and divergence limits that track the portfolios risks against their respective benchmarks.

Investment departments are expected to stay within their limits but are allowed to request limit increases from the relevant Senior Management Team (SMT) member or Investment Planning Committee (IPC) dependent upon established escalation guidelines. Any limit excesses are reported to the SMT member and/or the IPC. These groups will then make an assessment as to whether to increase the limit or reduce the position.

Market risk comprises the following:

Equity risk

The CPP Investment Portfolio invests in both publicly traded and private equities. Equity risk, which is the risk that the fair value or future cash flows will fluctuate because of changes in equity prices, is a significant source of risk of the investment portfolio.

After taking into account derivative positions and with all other variables held constant, a 1% decrease/increase in the S&P 500 Index would result in a loss/profit of \$1,060 million (March 31, 2018 - \$1,200 million, December 31, 2017 - \$1,200 million) on public equity investments. This calculation assumes that equities other than the S&P 500 Index would move in accordance with their historical behaviour conditional on a 1% decrease/increase in the S&P 500 Index.

Notes to the Condensed Interim Consolidated Financial Statements

For the three and nine months ended December 31, 2018

(Unaudited)

Currency risk

The CPP Investment Portfolio is exposed to currency risk through holdings of investments or investment liabilities in various currencies. Fluctuations in the relative value of foreign currencies against the Canadian dollar can result in a positive or negative effect on the fair value or future cash flows of these investments and investment liabilities.

In Canadian dollars, the net currency exposures, after allocating foreign currency derivatives are as follows:

Currency risk exposures

<i>(CAD millions)</i>	As at December 31, 2018		As at March 31, 2018		As at December 31, 2017	
	Net exposure	% of total	Net exposure	% of total	Net exposure	% of total
United States dollar	\$ 192,995	52 %	\$ 171,898	48 %	\$ 144,476	43 %
Euro	33,847	9	36,135	10	36,055	11
British pound sterling	18,230	5	19,329	5	18,918	5
Australian dollar	13,022	4	11,889	3	10,370	3
Chinese yuan	9,974	3	6,412	2	5,904	2
Hong Kong dollar	9,901	3	8,086	2	6,279	2
Japanese yen	9,411	2	15,019	4	19,445	6
Indian rupee	6,065	2	4,947	1	4,387	1
Brazilian real	3,621	1	2,422	1	2,292	1
South Korean won	3,323	1	3,680	1	3,587	1
Other	15,322	4	19,391	7	18,628	5
Total foreign exposure	315,711	86	299,208	84	270,341	80
Canadian dollar	52,652	14	57,114	16	66,823	20
Total	\$ 368,363	100 %	\$ 356,322	100 %	\$ 337,164	100 %

With all other variables and underlying values held constant, a 1% appreciation/depreciation of the Canadian dollar against all other currencies would result in a decrease/increase in net investments as follows:

Currency risk sensitivity

<i>(CAD millions)</i>	As at December 31, 2018		As at March 31, 2018		As at December 31, 2017	
	Decrease/Increase in Net Assets		Decrease/Increase in Net Assets		Decrease/Increase in Net Assets	
United States dollar	\$ 1,930		\$ 1,719		\$ 1,445	
Euro	338		361		361	
British pound sterling	182		193		189	
Australian dollar	130		119		104	
Other	577		600		604	
Total	\$ 3,157		\$ 2,992		\$ 2,703	

Notes to the Condensed Interim Consolidated Financial Statements

For the three and nine months ended December 31, 2018

(Unaudited)

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of an investment or investment-related liability will fluctuate because of changes in market interest rates. The CPP Investment Portfolio is exposed to interest rate risk primarily through holdings of fixed income securities, certain investment liabilities and interest rate derivative instruments.

With all other variables held constant, a 1 basis point increase/decrease in nominal risk free rates would result in a decrease/increase in the value of investments directly impacted by interest rate changes as follows:

Interest rate risk sensitivity¹

<i>(CAD millions)</i>	As at December 31, 2018		As at March 31, 2018		As at December 31, 2017	
Maturity	Decrease/Increase in Net Assets		Decrease/Increase in Net Assets		Decrease/Increase in Net Assets	
Within 1 year	\$	-	\$	-	\$	-
1 to 5 years		13		12		10
6 to 10 years		15		13		9
Over 10 years		41		37		37
Total	\$	69	\$	62	\$	56

¹ This sensitivity only applies to small yield curve changes. More substantial (stress) shocks would impact the value of real assets but for 1 basis point moves their values remain unchanged.

The CPP Investment Portfolio's sensitivity to various countries' risk free rates are concentrated in North America with 42% (March 31, 2018 – 51%, December 31, 2017 – 51%) in Canada, 46% (March 31, 2018 – 47%, December 31, 2017 – 49%) in the United States, 7% (March 31, 2018 – 1%, December 31, 2017 – (1%)) in Europe, and minor exposures to other regions in all periods.

Credit spread risk

Credit spread is the difference in yield on certain securities compared to a comparable risk free security (i.e. government issued) with the same maturity date. Credit spread risk is the risk that the fair value of these securities will fluctuate because of changes in credit spread. As at December 31, 2018, 70% (March 31, 2018 – 80%, December 31, 2017 – 84%) of credit spread risk was in A or better rated debt, primarily in Canadian provincial bonds.

With all other variables held constant, a 1 basis point widening of the credit spreads would result in a decrease in net assets by \$31 million (March 31, 2018 – \$30 million, December 31, 2017 - \$31 million).

Other price risk

Other price risk is the risk that the fair value or future cash flows of an investment will fluctuate because of changes in market prices arising from other risk factors such as commodity price risk, basis risk and volatility.

b) Credit risk

Credit risk is the risk of financial loss due to a counterparty failing to meet its contractual obligations, or a reduction in the value of the assets due to a decline in the credit quality of the borrower, counterparty, guarantor or the assets (collateral) supporting the credit exposure. The CPP Investment Portfolio's credit risk exposure arises primarily through its investment in debt securities and over-the-counter derivatives.

Notes to the Condensed Interim Consolidated Financial Statements

For the three and nine months ended December 31, 2018

(Unaudited)

The carrying amounts of these investments as presented in the Condensed Interim Consolidated Schedule of Investment Portfolio represent the maximum direct credit risk exposure at the Balance Sheet date.

The fair value of debt securities and over-the-counter derivatives exposed to credit risk, by credit rating category and without taking account of any collateral held or other credit enhancements was as follows:

Credit risk exposures

Credit rating	As at December 31, 2018							As at March 31, 2018		As at December 31, 2017	
	Bonds ¹	Money market securities ¹	Reverse repurchase agreements ¹	Over-the-counter derivatives	Other ^{1,2}	Total	% of total	Total	% of total	Total	% of total
AAA	\$ 16,544	\$ 25	\$ -	\$ -	\$ 940	\$ 17,509	17 %	\$ 12,072	13 %	\$ 10,830	11 %
AA	30,166	1,769	418	115	147	32,615	31	28,801	32	30,926	32
A	23,770	3,203	1,477	2,432	496	31,378	30	33,457	37	36,163	37
BBB	3,471	-	1,287	798	1,356	6,912	7	5,038	6	9,801	10
BB	434	-	-	-	4,626	5,060	5	3,770	4	3,227	3
B	9	-	-	-	8,726	8,735	8	6,065	7	5,366	6
CCC/D	-	-	-	-	1,662	1,662	2	783	1	741	1
Total	\$ 74,394	\$ 4,997	\$ 3,182	\$ 3,345	\$ 17,953	\$ 103,871	100 %	\$ 89,986	100 %	\$ 97,054	100 %

¹ Includes accrued interest.

² Includes direct investments in private debt, private real estate debt and asset-backed securities.

In addition to the above, the CPP Investment Portfolio is indirectly exposed to credit risk on the underlying securities of fund investments.

Credit risk exposure is mitigated on certain financial assets and financial liabilities, which have conditional offset rights in the event of default, insolvency or bankruptcy. For securities purchased under reverse repurchase agreements, securities sold under repurchase agreements and over-the-counter derivatives, collateral is collected from or pledged to counterparties to manage credit exposure (see note 8). In addition, in the event of default, amounts with a specific counterparty are settled on a net basis under master netting or similar arrangements, such as the Global Master Repurchase Agreement and the International Swaps and Derivatives Association Netting Agreements.

Credit VaR

Credit Risk for the CPP Investment Portfolio is estimated using a Monte Carlo simulation that incorporates likelihood of default, credit rating migration and recovery in the event of default for underlying credit instruments. The primary risk measure used to monitor credit risk at the total portfolio level is VaR over a one year period at a 99% level of confidence. As at December 31, 2018, Credit VaR was \$5,166 million (March 31, 2018 - \$4,106 million, December 31, 2017 - \$3,700 million) which implies there is a 1% chance that the CPP Investment Board portfolio of credit instruments will lose more than this amount in any given year due to default and credit migration risk.

c) Absolute risk

CPP Investment Board uses a simulation methodology to derive a distribution of potential portfolio outcomes at a future point in time. These distributions are used to estimate a variety of risk measures to monitor the absolute risk of the CPP Investment Portfolio across various time periods. The primary risk governance measure within the Risk/Return Accountability Framework is expressed using an equity/debt risk equivalency ratio. It is the proportion of equity versus debt in a simple two-asset-portfolio (Global Equity and Canadian Government Bonds) that would give the same measured absolute risk as that of the CPP Investment Portfolio. Absolute Risk for this purpose is defined as the Conditional Value at Risk (CVaR), after

inflation, at the 90th percentile expressed over a five-year horizon and encompasses both market and credit risks.

The Absolute Risk measure, CVaR, is based on the average of the worst ten percent outcomes in the simulated return distribution over a five-year period. It captures the impact of extreme market events that would lead to large losses within the CPP Investment Portfolio.

The methodology employed to calculate CVaR assumes that historical market data is a sound basis for estimating potential future losses but it allows for the incorporation of forward-looking return expectations. If future market conditions and interrelationships of equity markets, interest rates, foreign exchange rates and other market prices differ significantly from those of the past, then the actual losses could materially differ from those estimated. To ensure a variety of business cycles and market conditions are captured within the risk model, a long historical data period (1971 - current) is used in simulating the distribution of potential outcomes. The CVaR measure provides an estimate of the average value in this distribution of potential losses that CPP Investment Portfolio could experience. It is not an estimate of the worst-case scenario.

As at December 31, 2018, the CVaR of the CPP Investment Portfolio was \$67,018 million (March 31, 2018 - \$70,328 million, December 31, 2017 - \$68,800 million) with an associated equity/debt risk equivalency ratio of 87% (March 31, 2018 - 86%, December 31, 2017 - 87%). Note that the CVaR measure necessitates an estimate of mean expected returns on the CPP Investment Portfolio over the upcoming five years. The above CVaR estimate is strongly influenced by equity returns realized throughout the historical data period used within the risk model. As forward-looking expectations are further considered within the modeling process the CVaR value may move materially as the mean return estimates change through time. Changes in equity/debt risk equivalency ratio will also occur, but likely smaller in magnitude.

d) Liquidity risk

Liquidity risk is the risk of being unable to generate sufficient cash or its equivalent in a timely and cost-effective manner to meet commitments and liabilities as they come due. CPP Investment Board supplements its management of liquidity risk through its ability to raise funds through the issuance of commercial paper and term debt and transacting in securities sold under repurchase agreements.

CPP Investment Board also maintained \$6,280 million (March 31, 2018 - \$6,012 million, December 31, 2017 - \$5,900 million) of unsecured credit facilities to meet potential liquidity requirements. There were no credit facilities drawn as at December 31, 2018, March 31, 2018 and December 31, 2017.

Refer to note 7e for investment liabilities terms to maturity.

8. Collateral

Collateral transactions are conducted to support investment activities under terms and conditions that are common and customary to collateral arrangements. The net fair value of collateral held and pledged was as follows:

Collateral held and pledged

<i>(CAD millions)</i>	As at December 31, 2018	As at March 31, 2018	As at December 31, 2017
Third-party assets held as collateral on¹:			
Reverse repurchase agreements	\$ 3,188	\$ 6,187	\$ 15,614
Over-the-counter derivative transactions	1,263	692	642
Securities lent ²	1,564	-	-
Other debt	778	760	761
Own and third-party assets pledged as collateral on:			
Repurchase agreements	(32,103)	(32,621)	(32,139)
Securities sold short ^{3,4}	(26,190)	(16,610)	(19,125)
Over-the-counter derivative transactions	(935)	(315)	(203)
Private equities	(7,555)	(5,942)	(5,203)
Other debt	(4,672)	(4,417)	(4,126)
Total	\$ (64,662)	\$ (52,266)	\$ (43,779)

¹ The fair value of the collateral held that may be sold or repledged as at December 31, 2018 was \$4,135 million (March 31, 2018 - \$6,967 million, December 31, 2017 - \$16,402 million). The fair value of collateral sold or repledged as at December 31, 2018 was \$1,242 million (March 31, 2018 - \$5,969 million, December 31, 2017 - \$10,966 million).

² Includes cash collateral of \$1,395 million (March 31, 2018 – nil, December 31, 2017 – nil). The fair value of securities lent as at December 31, 2018 was \$1,539 million (March 31, 2018 – nil, December 31, 2017 – nil).

³ The fair value of securities borrowed as at December 31, 2018 was \$21,224 million (March 31, 2018 – \$13,045 million, December 31, 2017 – \$12,871 million) of which \$20,757 million was sold or repledged (March 31, 2018 – \$12,547 million, December 31, 2017 – \$12,871 million) for securities sold short.

⁴ Comparative figures have been revised to include third-party collateral pledged on bond shorts.

9. Commitments

CPP Investment Board has entered into commitments related to the funding of investments. These commitments are generally payable on demand based on the funding needs of the investment subject to the terms and conditions of each agreement. As at December 31, 2018, the unfunded commitments totalled \$46,641 million (March 31, 2018 - \$41,767 million, December 31, 2017 - \$41,200 million).

CPP Investment Board made lease and other commitments, which require future annual payments as follows:

Lease and other commitments

<i>(CAD millions)</i>	As at December 31, 2018	As at March 31, 2018	As at December 31, 2017
Within one year	\$ 34	\$ 36	\$ 35
After one year but not more than five years	135	115	112
More than five years	9	26	29
Total	\$ 178	\$ 177	\$ 176

10. Related party transactions

Related parties of CPP Investment Board include unconsolidated subsidiaries, joint ventures and associates and all related party investments are measured at fair value.

CPP Investment Board provides financial or other support to investment holding subsidiaries (as referred to in note 1b) to fund their day-to-day operations and investment activities under loan agreements or shareholder's resolutions, as needed.

In addition, CPP Investment Board owns interests in unconsolidated subsidiaries that are themselves investments. These investments, some of which may be wholly-owned, are controlled through ownership rights directly or indirectly by CPP Investment Board.

Investments in joint ventures are those arrangements where CPP Investment Board has joint control. An associate is an entity which CPP Investment Board has the ability to exercise significant influence over decision making.

Related party transactions consist of investments and investment income primarily in private equities, debt and real assets. These transactions are measured at fair value and will, therefore, have the same impact on net assets and net investment income as those investment transactions with unrelated parties.

Related party transactions with consolidated subsidiaries are eliminated upon consolidation.

11. Guarantees

As part of certain investment transactions, CPP Investment Board agreed to guarantee, as at December 31, 2018, up to \$4,481 million (March 31, 2018 - \$2,842 million, December 31, 2017 - \$2,600 million) to other counterparties in the event certain investee entities default under the terms of loan and other related agreements.

12. Enhanced Canada Pension Plan

In December 2016, Royal Assent was given to Bill C-26 titled *An Act to Amend the Canada Pension Plan, the Canada Pension Plan Investment Board Act and the Income Tax Act*. These legislative amendments increase the amount of CPP contributions and the corresponding retirement pensions and other benefits that will be paid on CPP contributions made after 2018. The CPP Act now defines two separate parts of the CPP as the "base" CPP (being the existing CPP) and "additional" CPP (being the new contributions and corresponding benefits). The additional CPP contributions began on January 1, 2019. The assets of the additional CPP will be accounted for separately from those of the base CPP.

In order to prepare for the additional CPP account, costs have been incurred by CPP Investment Board. Since CPP Investment Board has not received additional CPP contributions until January 1, 2019, these costs have been paid for from funds transferred to CPP Investment Board on account of the base CPP. To ensure that these costs and the related accrued interest are properly attributed to the additional CPP rather than the base CPP, CPP Investment Board will reimburse the base CPP account from the additional CPP account once CPP Investment Board has received sufficient additional CPP funds to do so.

As at December 31, 2018, the CPP Investment Board has incurred \$23 million (March 31, 2018 - \$8 million, December 31, 2017 – nil) in order to prepare for the additional CPP. The amount is recorded in other assets.
